SUMMARY

Mobile Application Developer with 4.4+ years of experience designing, developing, and maintaining cross-platform mobile applications using React Native, React.js, TypeScript, and JavaScript (ES6+). Proven track record delivering healthcare, telemedicine, and government solutions, with strong expertise in offline-first architecture, REST API integration, Firebase services, UI/UX-aligned interface development, and full mobile application lifecycle management from design through Play Store deployment and post-release support.

Hands-on production experience on Android (Google Play Console deployment); working knowledge of iOS development concepts and React Native's cross-platform build process, gained through cross-platform architecture and code-sharing work. Comfortable ramping up on Xcode/iOS-specific tooling. Strong collaborator in Agile teams alongside backend developers, QA engineers, business analysts, and project managers.

CORE COMPETENCIES

Android & iOS (React Native) • REST API Integration • UI/UX Implementation • Mobile App Lifecycle Management • Redux Toolkit • Offline-First Architecture • Firebase (Auth, FCM, Analytics, Crashlytics) • Third-Party SDK Integration • Agile/Scrum • Performance Optimization

EXPERIENCE

React Native Developer **May 2022 – Present**

Dhanush Softech Pvt. Ltd., Hyderabad, India

- Designed and developed scalable cross-platform mobile applications using React Native, TypeScript, and JavaScript, following UI/UX best practices and platform design guidelines.
- Built reusable UI components using React Hooks and Redux Toolkit; collaborated with UI/UX designers to translate mockups into pixel-accurate, responsive interfaces.
- Implemented offline-first architecture using SQLite, AsyncStorage, and TypeORM, including automatic local-to-server data synchronization for low-connectivity environments.
- Integrated RESTful APIs with Java backend services and implemented Firebase Authentication, Cloud Messaging (FCM), Analytics, Crashlytics, Firestore, and Remote Config.
- Developed multilingual functionality (English and Hindi) and integrated third-party NPM libraries and native modules.
- Owned the full mobile application lifecycle — sprint planning, development, code reviews, QA handoff, Google Play Console deployment, and post-release monitoring/support.
- Optimized application performance by improving rendering efficiency, reducing unnecessary API calls, and resolving production issues; improved app stability through Crashlytics monitoring.
- Delivered 4 production mobile applications, including secure telemedicine and healthcare apps, in a 12-member Agile team.

KEY PROJECTS

JAPTI – Sahiya (ASHA) | Client: JAP-IT, Government of Jharkhand

Healthcare application digitizing field operations of ASHA workers, supporting online, offline, and low-connectivity environments for uninterrupted service delivery.

Technology: *React Native, TypeScript, Redux Toolkit, SQLite, AsyncStorage, TypeORM, Firebase, REST APIs*

- Implemented dynamic offline registration forms and offline-first architecture with automatic sync to backend servers.
- Developed analytics/reporting modules, multilingual support (English & Hindi), and Firebase Cloud Messaging notifications.

VIDMED | Client: Dhanush Softech Pvt. Ltd.

Telemedicine application enabling patients to consult doctors securely through real-time video and audio consultations.

Technology: *React Native, TypeScript, Redux Toolkit, Firebase, REST APIs*

- Developed patient consultation and appointment-scheduling workflows with integrated secure video/audio calling.
- Built responsive UI, integrated Firebase Authentication and Push Notifications, and supported production releases.

Uttarakhand Telemedicine – Patient, Agent & Doctor Apps | Government of Uttarakhand, Dept. of Health & Family Welfare

Hub-and-Spoke telehealth platform connecting 4 Medical Colleges with 400+ Health Centres across rural Uttarakhand, plus a doctor-facing app with ABHA (NDHM) integration and digital prescriptions.

Technology: *React Native, TypeScript, Firebase, SQLite, REST APIs*

- Built patient registration, appointment, and real-time video/audio consultation modules with offline data capture and sync.
- Developed role-based authentication, ABHA patient verification, and digital prescription/patient-history modules for the doctor app.
- Optimized performance and usability across 400+ healthcare facilities; performed debugging, testing, and production support.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+)

Mobile: React Native, React.js, Android (production), iOS (working knowledge – React Native cross-platform builds)

State Management: Redux, Redux Toolkit, React Hooks, Context API

Data & Storage: SQLite, AsyncStorage, TypeORM, Local Data Synchronization

Firebase: Authentication, Cloud Messaging (FCM), Analytics, Crashlytics, Firestore, Remote Config

APIs & Tools: RESTful APIs, Axios, JSON, Git/GitLab, Android Studio, VS Code, Postman, Google Play Console

Practices: Agile/Scrum, UI/UX Implementation, Performance Optimization, Code Reviews, Mobile App Lifecycle Management

EDUCATION

Master of Computer Applications (MCA) — Biju Patnaik University of Technology (BPUT), 2018 – 2020

Bachelor of Computer Applications (BCA) — Utkal University, PJ College of Management & Technology, 2015 – 2018

LANGUAGES

English, Hindi, Odia
